

6-QW-150T(850A)

The product has excellent high-current discharge characteristics and is widely used in starting, ignition, and lighting systems. It uses a grid made of lead-calcium alloy, requires no maintenance or water addition during use, has a long power storage time, and a wide applicable temperature range.

DIMENSION

SPECIFICATION

Nominal Voltage/V		12
Weight/±3%kg		38.8
Nominal Capacity/AH		156
Reserve Capacity/min		300
-18℃ CCA/A		850
Max Dimensions	L/mm	510
	W/mm	221
	H/mm	195
	T.H/mm	221
CCA		1000
Temperature	Discharge/℃	-40 ~ +60
	Charge/℃	-40 ~ +60
	Store/℃	-40 ~ +60
Optimum temperature/℃		+10 ~ +30
Constant charging current//A		15.6
Constant charging voltage/V		13.5 ~ 13.8
Max charging current/A		46.8
Cover material		PP
Executive standard		GB/T 5008-2023

TERMINAL DIMENSION

Discharge Curve/25℃
